

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A sheet for use in creating a pocket for a personalized presentation folders, comprising;
a blank of material sized and configured to provide a presentation folder and suitable for processing through a printing means capable of producing variable print;
a sheet of material capable for receiving printing or imaging, said sheet having a first face and a second face and first and second transversely extending edges and first and second longitudinally extending edges;
at least first and second strips of adhesive disposed adjacent one of said first and second transversely extending edges or said first and second longitudinally extending edges, each of said first and second strips of adhesive having first and second edges;
at least first and second lines of weakness, said first line of weakness disposed along one of said first and second edges of each of said first and second strips of adhesive;
said second line of weakness disposed substantially perpendicularly to said first line of weakness and running from said first edge to said second edge of each of said first and second strips of adhesive; ~~and~~
a fold line running between one of said first and second transversely extending edges or said first and second longitudinally extending edges defining first and second panels which are folded about said fold line to create the pocket along with at least one of said first and second strips of adhesive; and
said sheet with said first and second strips of adhesive, fold line and lines of weakness being formed into a pocket which can be attached to said blank.
2. (Original) A sheet for use in creating a pocket for folders as recited in claim 1, wherein said second line of weakness runs parallel to said fold line.

3. (Original) A sheet for use in creating a pocket for folders as recited in claim 1, wherein said fold line is disposed substantially medially of said sheet.
4. (Original) A sheet for use in creating a pocket for folders as recited in claim 1, wherein said strips of adhesive are selected from a group that include segments, spots, patterns, continuous arrangements, discontinuous arrangements and combinations thereof.
5. (Original) A sheet for use in creating a pocket for folders as recited in claim 1, wherein said strips of adhesive are selected from repositional, removable, permanent, remoistenable, hot melt, pressure seal cohesives, cold glues and combinations and mixtures thereof.
6. (Original) A sheet for use in creating a pocket for folders as recited in claim 1, wherein said lines of weakness are selected from a group including perforations, die cuts, score lines and combinations thereof.
7. (Original) A sheet for use in creating a pocket for folders as recited in claim 1, wherein each of said strips of adhesive have a width less than a width of said sheet.
8. (Original) A sheet for use in creating a pocket for folders as recited in claim 1, wherein said second line of weakness divides each of said first and second strips of adhesive into first and second sections.
9. (Original) A sheet for use in creating a pocket for folders as recited in claim 8, wherein each of said first and second sections are substantially equal.

10. (Original) A sheet for use in creating a pocket for folders as recited in claim 8, wherein one of said first and second sections has a length greater than another of said first and second sections.

11. (Original) A sheet for use in creating a pocket for folders as recited in claim 1, wherein said first and second lines of weakness cooperate to form first and second removable portions along each of one of said first and second transversely extending edges or said first and second longitudinally extending edges.

12. (Currently Amended) A sheet for use in creating a pocket for folders as recited in claim 11, wherein one of said first and second removable portions is removed from each of said one extending edges of said sheet prior to forming said pocket.

13. (Original) A sheet for use in creating a pocket for folders as recited in claim 12, wherein said removed sections of each of said extending edges are at opposite corners of said sheet.

14. (Original) A sheet for use in creating a pocket for folders as recited in claim 1, wherein said fold line is used to create first and second folder pocket walls.

15. (Original) A sheet for use in creating a pocket for folders as recited in claim 14, wherein said first and second pocket walls are substantially equal in size.

16. (Original) A sheet for use in creating a pocket for folders as recited in claim 14, wherein said first and second pocket walls are unequal in size.

17. (Cancelled).

18. (Original) A personalized presentation folder having at least one pocket formed from a separate sheet of material, comprising;

a blank of material sized and configured to provide a presentation folder and suitable for processing through a printing means capable of producing variable print;

a separate sheet of material capable of receiving printing or imaging and for forming the pocket, said sheet having a first face and a second face and first and second transversely extending edges and first and second longitudinally extending edges;

at least first and second strips of adhesive disposed adjacent one of said first and second transversely extending edges or said first and second longitudinally extending edges, each of said first and second strips of adhesive having first and second edges;

at least first and second lines of weakness, said first line of weakness disposed along one of said first and second edges of each of said first and second strips of adhesive;

said second line of weakness disposed substantially perpendicularly to said first line of weakness and running from said first edge to said second edge of each of said first and second strips of adhesive;

a fold line running between one of said first and second transversely extending edges or said first and second longitudinally extending edges; and

said sheet with said first and second strips of adhesive, fold lines and lines of weakness being formed into a pocket which can be attached to said blank.

19. (Original) A personalized presentation folder having at least one pocket formed from a separate sheet of material as recited in claim 18, wherein said printing applied to said blank and said sheet contains personalized or individualized information.

20. (Original) A personalized presentation folder having at least one pocket formed from a separate sheet of material as recited in claim 19, wherein said printing on said blank and said sheet is complimentary to one another.
